- All procedure and investigation fees include specialist charges, diagnostic pathology and consumables where relevant
- These prices are based on a single lump biopsy. An additional £500 is charged per additional biopsy to cover extra specialist, consumable and pathology charges
- Consultation fees are charged separately
- These are standard charges but some may vary according to agreements with medical insurance companies
- Patients paying for their own treatment, resident overseas or with non UK based insurers will be expected to settle charges in full on the day
- Patients insured with UK based insurers will be required to provide a membership and pre-authorisation number for the invoices to be submitted directly to their insurer. Patients with medical insurance will remain liable for all

charges until settled and will be asked to pay for invoices not settled within 3 months in addition to any policy excesses or items not covered by their insurer.

- In-patient surgical procedures are billed in accordance with insurance company guidelines and patients will be provided with the CCSD code to gain pre-authorisation for the procedure and admission from their insurers. Self pay patients will be provided with a fee estimate in advance of the procedure to cover surgeon, anaesthetist and hospital charges. As a guide fees are routinely in accordance with the WPA fee schedule <http://www.wpa.org.uk/medical/feesearch.aspx>
